

Newsletter March 2025

Welcome to the Quarter One newsletter for the RATIONAL Platform Trial and the RATIONALISE Trial (the STOP-Ig domain of the RATIONAL Platform).

Take a look and see what's new!

RATIONAL-PT Update

It has been a busy and productive last year across Australia, with multiple site start-ups completed. We currently have eight active Australian sites participating in the platform trial, with several more progressing towards activation this year.

Our active sites span Victoria, New South Wales, Queensland, and South Australia with participant recruitment underway.

We thank all teams for their ongoing commitment and collaboration as the RATIONAL-PT continues to grow.

Welcome Canada!

We are very pleased to share that RATIONAL-PT has now officially launched in Canada under the leadership of Dr Jeannie Callum (pictured), with funding awarded by the Canadian Institutes of Health Research (CIHR).

The Canadian arm of RATIONAL-PT trial will support all domains of the platform. This expansion represents an important milestone in the continued international growth of the trial.

Launching the trial in Canada has been a significant process, and we would like to sincerely thank all of our Canadian team members for their dedication and hard work. We look forward to collaborating closely as we begin activating Canadian hospitals.

Meet our New Team Member

Tasmyn Greentree joins the team as a Research Officer for the RATIONAL-PT and RATIONALISE trials. Tasmyn is a graduate of Bach. Pharmaceutical Sciences (Hons) and has recently completed an internship with the Transfusion Research Unit. She joins the team supporting the administration of both trials.
